

The Associated Press-NORC
Center for Public Affairs Research

American Teens are Politically Engaged but Pessimistic about Country's Direction

Conducted by The Associated Press-NORC Center for Public Affairs Research

Interviews: 12/7-31/2016

790 teens age 13-17

Margin of error: 4.6 percentage points at the 95% confidence level among all adults

NOTE: All results show percentages among all respondents, unless otherwise labeled.

AMERICAN TEENS ARE POLITICALLY ENGAGED BUT PESSIMISTIC ABOUT COUNTRY'S DIRECTION

Some questions held for future release.

P1. And now, switching gears... Generally speaking, would you say things in this country are heading in the right direction or the wrong direction?

	AP-NORC 12/7-31/2016
Right direction	37
Wrong direction	61
DON'T KNOW	2
SKIP/REFUSED	1

² Parent education and parent race/ethnicity were asked of parents and only apply to the parent who was sampled as an AmeriSpeak® Panelist. Income was asked of parents as well, but applies to the entire household.

AP-NORC Center for Public Affairs Research Poll

Study Methodology

This survey was conducted by The Associated Press-NORC Center for Public Affairs Research and with funding from NORC at the University of Chicago. Data were collected using AmeriSpeak, NORC's probability-based panel designed to be representative of the U.S. household population. The survey was part of a larger study that included questions about other topics not included in this report. During the initial recruitment phase of the panel, randomly selected U.S. households were sampled with a known, non-zero probability of selection from the NORC National Sample Frame and then contacted by U.S. mail, email, telephone, and field interviewers (face-to-face).

Interviews for this survey were conducted between December 7 and 31, 2016, with teenagers age 13 to 17 representing the 50 states and the District of Columbia. Adult panel members were randomly drawn from AmeriSpeak, and after confirming that there were children of the appropriate age in the household, permission was sought from a parent or guardian to survey their teenager. If a given panelist had multiple teens at home, one teen was randomly selected to participate. Completed interviews were conducted with 790 teenagers, 739 via the web and 51 via telephone. Interviews were conducted in both English and Spanish, depending on respondent preference.

The final stage completion rate is 31.5 percent, the weighted household panel response rate is 34.3 percent, and the weighted household panel retention rate is 95 percent, for a cumulative response rate of 10.3 percent. The overall margin of sampling error is +/- 4.6 percentage points at the 95 percent confidence level, including the design effect. The margin of sampling error may be higher for subgroups.

Once the sample has been selected and fielded, and all the study data have been collected and made final, a poststratification process is used to adjust for any survey nonresponse as well as any non-coverage or under- and oversampling resulting from the study specific sample design. Poststratification variables at the adult level included age, sex, education, race/ethnicity, housing tenure, telephone status, and Census division. This produced a weight for each teen that was then adjusted so as to be calibrated to the external controls totals for age, sex, race/ethnicity, Census division, and household income for the U.S. population of teenagers age 13 to 17. The weighted data were used for all analyses.

All differences reported between subgroups of the U.S. population are at the 95 percent level of statistical significance, meaning that there is only a 5 percent (or lower) probability that the observed differences could be attributed to chance variation in sampling.

A comprehensive listing of the questions, complete with tabulations of top-level results for each question, is available on The AP-NORC Center website: www.apnorc.org.

About the Associated Press-NORC Center for Public Affairs Research

The AP-NORC Center for Public Affairs Research taps into the power of social science research and the highest-quality journalism to bring key information to people across the nation and throughout the world.

- The Associated Press (AP) is the world's essential news organization, bringing fast, unbiased news to all media platforms and formats.
- NORC at the University of Chicago is one of the oldest and most respected, independent research institutions in the world.

AMERICAN TEENS ARE POLITICALLY ENGAGED BUT PESSIMISTIC ABOUT COUNTRY'S DIRECTION

The two organizations have established the AP-NORC Center for Public Affairs Research to conduct, analyze, and distribute social science research in the public interest on newsworthy topics, and to use the power of journalism to tell the stories that research reveals.

The founding principles of The AP-NORC Center include a mandate to carefully preserve and protect the scientific integrity and objectivity of NORC and the journalistic independence of AP. All work conducted by the Center conforms to the highest levels of scientific integrity to prevent any real or perceived bias in the research. All of the work of the Center is subject to review by its advisory committee to help ensure it meets these standards. The Center will publicize the results of all studies and make all datasets and study documentation available to scholars and the public.
