## Study Methodology

This public use file and codebook contain data for two separate surveys that were fielded concurrently. The data from these surveys were used to develop two reports:

- Americans Evaluate the Balance Between Security and Civil Liberties
- Americans' Priorities for 2016

These two surveys were conducted by the Associated Press-NORC Center for Public Affairs Research and with funding from NORC at the University of Chicago. Data were collected using the AmeriSpeak Panel, which is a probability-based panel designed to be representative of the U.S. household population. The survey was part of a larger omnibus survey that included questions about other topics not included in this report. During the initial recruitment phase of the panel, randomly selected U.S. households were sampled with a known, nonzero probability of selection from the NORC National Sample Frame and then contacted by U.S. mail, email, telephone, and field interviewers (face-to-face).

Interviews for this survey were conducted between December 10-13, 2015, with adults age 18 and over from the 50 states and the District of Columbia. Panel members were randomly drawn from the AmeriSpeak Panel, and 1,042 completed the survey—728 via the web and 314 via telephone. The final stage completion rate is 30.5 percent, the weighted household panel response rate is 36.8 percent, and the weighted household panel retention rate is 99 percent, for a cumulative response rate of 11.1 percent. The overall margin of sampling error is +/- 3.9 percentage points at the 95 percent confidence level, including the design effect. The margin of sampling error may be higher for subgroups.

Once the sample has been selected and fielded, and all the study data has been collected and made final, a poststratification process is used to adjust for any survey nonresponse as well as any non-coverage or under- and oversampling resulting from the study-specific sample design. Poststratification variables included age, gender, Census division, race/ethnicity, and household phone status. The weighted data, which reflect the U.S. population of adults age 18 and over, were used for all analyses.

## About the Associated Press-NORC Center for Public Affairs Research

The AP-NORC Center for Public Affairs Research taps into the power of social science research and the highest quality journalism to bring key information to people across the nation and throughout the world.

- The Associated Press is the world's essential news organization, bringing fast, unbiased news to all media platforms and formats.
- NORC at the University of Chicago is one of the oldest and most respected, objective social science research institutions in the world.

The two organizations have established the AP-NORC Center to conduct, analyze, and distribute social science research in the public interest on newsworthy topics, and to use the power of journalism to tell the stories that research reveals.

The founding principles of the AP-NORC Center include a mandate to carefully preserve and protect the scientific integrity and objectivity of NORC and the journalistic independence of The Associated Press. All work conducted by the AP-NORC Center conforms to the highest levels of scientific integrity to prevent any real or perceived bias in the research. All of the work of the AP-NORC Center is subject to review by its advisory committee to help ensure it meets these standards. The AP-NORC Center publicizes the results of all studies and makes all datasets and study documentation available to scholars and the public.
