Center for Public Affairs Research

Employer Perspectives on the Health Insurance Market: A Survey of Businesses in the United States

**Conducted by The Associated Press-NORC Center for Public Affairs Research
with funding from the Robert Wood Johnson Foundation**

Interview dates: August 19, 2014 – October 8, 2014

Interviews: Nationally representative survey of 1,061 private sector employers with at least 3 employees

Margin of error: +/- 5.6 percentage points at the 95% confidence level

NOTE: All results show percentages among all respondents, unless otherwise labeled.

D1. To begin, I have a few questions about your organization and the types of benefits your organization offers to some or all of its employees.

Including workers at all locations and sites, how many people are currently employed full-time by your organization?

D2. Including workers at all locations and sites, how many people are currently employed part-time by your organization? Please note, a part-time employee is defined as an employee who works less than 30 hours per week on average.

	AP-NORC 8/19-10/8

ORGANIZATION/RESPONDENT BACKGROUND

DINTRO. Finally, we have a few questions for statistical purposes.

D4. Which category comes closest to describing your current position in your organization?

[DO NOT RANDOMIZE RESPONSE OPTIONS]

	AP-NORC 8/19-10/8
Human Resources Manager	11
Benefits Manager	2
Executive Officer/Corporate Officer	18
Owner	31
Office manager/branch manager	30
Project or Program Manager	2
Other (SPECIFY)	6
Don't know	-
Refused	1
<i>N=</i>	<i>1061</i>

D6. Is your organization a private for-profit organization, or a not-for-profit organization?

[DO NOT RANDOMIZE RESPONSE OPTIONS]

	AP-NORC 8/19-10/8
Private for-profit	86
Not-for-profit organization	14
Other (SPECIFY)	*
Don't know	*
Refused	*
<i>N=</i>	<i>1061</i>

D7. Is your organization primarily a...?

[DO NOT RANDOMIZE RESPONSE OPTIONS]

	AP-NORC 8/19-10/8
Manufacturing organization	10
Health care organization	17
Service, retail or wholesale organization	51
Some other type of organization (SPECIFY)	23
Professional services (VOL)	12
Education (VOL)	2
Construction (VOL)	3
Other	6
Don't know	-
Refused	-

Study Methodology

This survey, funded by the Robert Wood Johnson Foundation, was conducted by the Associated Press-NORC Center for Public Affairs Research between the dates of August 19 and October 8, 2014. Staff from NORC at the University of Chicago, the Associated Press, and the Robert Wood Johnson Foundation collaborated on all aspects of the study.

This nationally representative survey of employers was conducted via web and telephone with 1,061 employers with at least three employees, full-time or part-time. Interviews were completed over the telephone by professional interviewers who were carefully trained on the specific study (n=445) or through an online survey (n=616). Respondents were offered a \$50 monetary incentive for participating, as compensation for their time. A “most knowledgeable respondent” method was used to select the respondent in the organization who could best answer the survey. Thirty-one percent of respondents identified themselves as business owners, 30 percent as office managers, 18 percent as executive officers, 11 percent as human resources managers, 2 percent as benefits managers, 2 percent as project managers, and 6 percent as another position.

NORC selected the sample of businesses from the Dunn and Bradstreet business data supplied by Survey Sampling International and included an oversample of large businesses to ensure sufficient sample size for analysis. In the United States, a majority (96 percent) of employers are small businesses with fewer than 50 employees, although these organizations only employ 28 percent of workers. Medium- and large-sized businesses, with 50 or more employees, are 4 percent of the employer population, but they employ 72 percent of workers.¹

The sample was weighted to adjust for unequal sampling probabilities, unknown eligibility, nonresponse, and population coverage. A base weight was computed first to account for the selection probabilities under the sample design. The base weight was then adjusted to compensate for businesses that are of unknown eligibility and for those that refused to participate in the survey. Finally, a poststratification adjustment was applied to all complete cases to align the weighted sample distribution to 2011 census business (firm) counts by census region and size class. The 28 poststrata are defined by the four census regions crossed by seven size classes: 3-9, 10-24, 25-49, 50-199, 200-999, 1,000-4,999, and 5,000 or more workers. Only complete cases have a final weight. The weighted data, which represent the target population of the study, were used for all analyses. Unweighted sample sizes by business size groupings appear in the table below.

The final response rate was 22 percent, based on the American Association for Public Opinion Research Response Rate 3 method. The overall margin of error was +/- 5.6 percentage points, taking into account the complex sample design.

A complete study report is available on the AP-NORC Center for Public Affairs Research website: www.apnorc.org.

About the Associated Press-NORC Center for Public Affairs Research.

The AP-NORC Center for Public Affairs Research taps into the power of social science research and the highest quality journalism to bring key information to people across the nation and throughout the world.

- The Associated Press is the world's essential news organization, bringing fast, unbiased news to all media platforms and formats.
- NORC at the University of Chicago is one of the oldest and most respected, independent research institutions in the world.

The two organizations have established the Associated Press-NORC Center for Public Affairs Research to conduct, analyze, and distribute social science research in the public interest on newsworthy topics, and to use the power of journalism to tell the stories that research reveals.

The founding principles of the AP-NORC Center include a mandate to carefully preserve and protect the scientific integrity and objectivity of NORC and the journalistic independence of The Associated Press. All work conducted by the Center conforms to the highest levels of scientific integrity to prevent any real or perceived bias in the research. All of the work of the Center is subject to review by its advisory committee to help ensure it meets these standards. The Center will publicize the results of all studies and make all datasets and study documentation available to scholars and the public.
