## Study Methodology

This survey was conducted by The Associated Press-NORC Center for Public Affairs Research and with funding from The Associated Press and NORC at the University of Chicago. Data were collected using the AmeriSpeak Omnibus®, a monthly multi-client survey using NORC's probability-based panel designed to be representative of the U.S. household population. The survey was part of a larger study that included questions about other topics not included in this report. During the initial recruitment phase of the panel, randomly selected U.S. households were sampled with a known, non-zero probability of selection from the NORC National Sample Frame and then contacted by U.S. mail, email, telephone, and field interviewers (face-to-face). The panel provides sample coverage of approximately 97% of the U.S. household population. Those excluded from the sample include people with P.O. Box only addresses, some addresses not listed in the USPS Delivery Sequence File, and some newly constructed dwellings.

Interviews for this survey were conducted between December 13 and 16, 2018, with adults age 18 and over representing the 50 states and the District of Columbia. Panel members were randomly drawn from AmeriSpeak, and 1,067 completed the survey—992 via the web and 75 via telephone. Interviews were conducted in both English and Spanish, depending on respondent preference. The final stage completion rate is 20.1 percent, the weighted household panel response rate is 34.2 percent, and the weighted household panel retention rate is 85.1 percent, for a cumulative response rate of 5.8 percent. The overall margin of sampling error is +/- 4.1 percentage points at the 95 percent confidence level, including the design effect. The margin of sampling error may be higher for subgroups.

Once the sample has been selected and fielded, and all the study data have been collected and made final, a poststratification process is used to adjust for any survey nonresponse as well as any noncoverage or under and oversampling resulting from the study specific sample design. Poststratification variables included age, gender, census division, race/ethnicity, and education. Weighting variables were obtained from the 2018 Current Population Survey. The weighted data reflect the U.S. population of adults age 18 and over.

## About The Associated Press-NORC Center for Public Affairs Research

The AP-NORC Center for Public Affairs Research taps into the power of social science research and the highest quality journalism to bring key information to people across the nation and throughout the world.

- The Associated Press is the world's essential news organization, bringing fast, unbiased news to all media platforms and formats.
- NORC at the University of Chicago is one of the oldest and most respected, objective social science research institutions in the world.

The two organizations have established The AP-NORC Center to conduct, analyze, and distribute social science research in the public interest on newsworthy topics, and to use the power of journalism to tell the stories that research reveals.

The founding principles of The AP-NORC Center include a mandate to carefully preserve and protect the scientific integrity and objectivity of NORC and the journalistic independence of The Associated Press. All work conducted by The AP-NORC Center conforms to the highest levels of scientific integrity to prevent any real or perceived bias in the research. All of the work of The AP-NORC Center is subject to review by its advisory committee to help ensure it meets these standards. The AP-NORC Center publicizes the results of all studies and makes all datasets and study documentation available to scholars and the public.

## Index of Variables: *Listed in the order they appear on the file*

#	Variable	Question	Type	Length	Label
1	SU_ID	N/A	Num	8	SU_ID: CasedID
2	FINALWT	N/A	Num	8	FINALWT: Post-stratification weights - 18+ general population (N=1,067)
3	SURV_MODE	N/A	Num	8	SURV_MODE: Survey mode
4	SURV_LANG	N/A	Num	8	SURV_LANG: Survey language

Variable #6 is collapsed or recoded from original data, making the coding frame of this variable different from the survey questionnaire. This variable is derived from more than one question.

Variables #205-213 are AmeriSpeak Omnibus® profile variables. These variables are collapsed or recoded to minimize the risk of disclosing respondent privacy.

Variables #7-160, 198, and 199 are recoded from original data that came from open ended responses to the questions.

## Details of Variables

- “.” Or space: logic skip, respondent is not applicable to a specific question
- 99: missing, survey non-respondent

<b>SURV_MODE: Survey mode</b>			
<b>SURV_MODE</b>	<b>Frequency</b>	<b>Weighted Frequency</b>	<b>Percent</b>
(1) Phone interview	75	81	7.55
(2) Web Interview	992	986	92.45
<b>Total</b>	<b>1,067</b>	<b>1,067</b>	<b>100.00</b>

<b>SURV_LANG: Survey language</b>			
<b>SURV_LANG</b>	<b>Frequency</b>	<b>Weighted Frequency</b>	<b>Percent</b>
