

MTV/AP-NORC: Comparing the Political Views of Young People and Their Parents' Generation

**Conducted by The Associated Press-NORC Center for Public Affairs Research
With funding from MTV and NORC at the University of Chicago**

Interviews: 4/23-5/9/2018

*939 young people age 15-34, including 558 young people age 15-26
607 parents of young people age 15-26*

*Margin of error: +/- 4.3 percentage points at the 95% confidence level among young people
age 15-34*

*Margin of error: +/- 5.6 percentage points at the 95% confidence level among young people
age 15-26*

*Margin of error: +/- 6.7 percentage points at the 95% confidence level among parents of young
people age 15-26*

NOTE: All results show percentages among all respondents, unless otherwise labeled.

Q1. Overall, do you approve or disapprove of the way Donald Trump is handling his job as president?

If don't know, skipped, or refused in Q1

Q1A. If you had to choose, do you lean more toward approving or disapproving of the way Donald Trump is handling his job as president?

If approve in Q1

Q1B. Would you say you approve of the way Donald Trump is handling his job as president strongly or do you approve just somewhat?

If disapprove in Q1

Q1C. Would you say you disapprove of the way Donald Trump is handling his job as president strongly or do you disapprove just somewhat?

Study Methodology

This survey was conducted by The Associated Press-NORC Center for Public Affairs Research and with funding from MTV and NORC at the University of Chicago. Staff from NORC at the University of Chicago, The Associated Press, and MTV collaborated on all aspects of the study.

Data were collected using AmeriSpeak®, NORC's probability-based panel designed to be representative of the U.S. household population. During the initial recruitment phase of the panel, randomly selected U.S. households were sampled with a known, non-zero probability of selection from the NORC National Sample Frame and then contacted by U.S. mail, email, telephone, and field interviewers (face-to-face). The panel provides sample coverage of approximately 97 percent of the U.S. household population. Those excluded from the sample include people with P.O. Box only addresses, some addresses not listed in the USPS Delivery Sequence File, and some newly constructed dwellings.

Interviews for this survey were conducted between April 23 and May 9, 2018, with young people age 15 to 34 and parents of young people age 15 to 26 representing the 50 states and the District of Columbia. Interviews were conducted in both English and Spanish, depending on respondent preference. Adult panel members age 18 to 34 were randomly drawn from AmeriSpeak, and 791 completed the survey—780 via the web and 11 via telephone. Teen panel members age 15 to 17 were drawn from AmeriSpeak Teen, and 148 completed the survey—145 via the web and 3 via telephone. Adult panel members who are known parents of 15 to 17 year olds were randomly drawn from AmeriSpeak, and 104 completed the survey—101 via the web and 3 via telephone. In addition, panel members age 30 to 76 were randomly drawn to screen for parents of young adults age 18 to 26, and 503 completed the survey—469 via the web and 34 via telephone.

Among young people age 15 to 34, the final stage completion rate is 25.9 percent, the weighted household panel response rate is 33.7 percent, and the weighted household panel retention rate is 87.2 percent, for a cumulative response rate of 7.6 percent. The overall margin of sampling error among young people age 15 to 34 is +/- 4.3 percentage points at the 95 percent confidence level, including the design effect. The overall margin of sampling error among young people age 15 to 26 is +/- 5.6 percentage points at the 95 percent confidence level, including the design effect. The margin of sampling error may be higher for subgroups.

Among parents of young people age 15 to 26, the screener completion rate is 27.9 percent, with an incidence rate of 25.2. The interview completion rate is 95.6 percent, and the final stage completion rate is 26.7 percent, the weighted household panel response rate is 33.7 percent, and the weighted household panel retention rate is 87.2 percent, for a cumulative response rate of 7.8 percent. The overall margin of sampling error is +/- 6.7 percentage points at the 95 percent confidence level, including the design effect. The margin of sampling error may be higher for subgroups.

Once the sample has been selected and fielded, and all the study data have been collected and made final, a poststratification process is used to adjust for any survey nonresponse as well as any noncoverage or under and oversampling resulting from the study specific sample design. Poststratification variables included age, gender, census division, race/ethnicity, and education. Weighting variables were obtained from the 2017 Current Population Survey. The weighted data reflect the U.S. population of young people age 15 to 34 and parents of young people age 15 to 26.

About the Associated Press-NORC Center for Public Affairs Research

The AP-NORC Center for Public Affairs Research taps into the power of social science research and the highest-quality journalism to bring key information to people across the nation and throughout the world.

- The Associated Press (AP) is the world's essential news organization, bringing fast, unbiased news to all media platforms and formats.
- NORC at the University of Chicago is one of the oldest and most respected, independent research institutions in the world.

The two organizations have established The AP-NORC Center for Public Affairs Research to conduct, analyze, and distribute social science research in the public interest on newsworthy topics, and to use the power of journalism to tell the stories that research reveals.

The founding principles of The AP-NORC Center include a mandate to carefully preserve and protect the scientific integrity and objectivity of NORC and the journalistic independence of AP. All work conducted by the Center conforms to the highest levels of scientific integrity to prevent any real or perceived bias in the research. All of the work of the Center is subject to review by its advisory committee to help ensure it meets these standards. The Center will publicize the results of all studies and make all datasets and study documentation available to scholars and the public.

About MTV

MTV is a global youth culture brand inspired by music. For more information, check out mtvpress.com. MTV is a unit of Viacom Inc. (NASDAQ: VIAB, VIA)
