

The June 2026 AP-NORC Center Poll

Conducted by The Associated Press-NORC Center for Public Affairs Research
With funding from The Associated Press and
NORC at the University of Chicago

*Interviews: 06/11-17/2026
3,040 adults*

*Margin of sampling error: +/- 2.8 percentage points at the 95% confidence level
among all adults*

*Republican, including leaners: N=878; margin of sampling error = +/- 4.6 percentage points
Independent, other, no answer: N=456; margin of sampling error = +/- 6.5 percentage points
Democrat, including leaners: N=1,706; margin of sampling error = +/- 4.1 percentage points*

NOTE: All results show percentages among all respondents, unless otherwise labeled.

CUR2. Overall, do you approve or disapprove of the way Donald Trump is handling his job as president?

CUR3. *If don't know, skipped, or refused in CUR2*

If you had to choose, do you lean more toward approving or disapproving of the way Donald Trump is handling his job as president?

CUR3A. *If approve in CUR2*

Would you say you approve of the way Donald Trump is handling his job as president strongly or do you approve just somewhat?

CUR3B. *If disapprove in CUR2*

Would you say you disapprove of the way Donald Trump is handling his job as president strongly or do you disapprove just somewhat?

Study Methodology

This survey was conducted by The Associated Press-NORC Center for Public Affairs Research and with funding from The Associated Press and NORC at the University of Chicago.

Data were collected using the AmeriSpeak Omnibus®, a monthly multi-client survey using NORC's probability-based panel designed to be representative of the U.S. household population. The survey was part of a larger study that included questions about other topics not included in this report. During the initial recruitment phase of the panel, randomly selected U.S. households were sampled with a known, non-zero probability of selection from the NORC National Sample Frame and then contacted by U.S. mail, email, telephone, and field interviewers (face-to-face). The National Sample Frame provides coverage of approximately 97 percent of the U.S. household population. The U.S. Postal Service delivery-sequence file (DSF) and National Consumer Address File have been used in a subset of years as a supplemental sample during AmeriSpeak panel recruitment for low coverage states. Those excluded from the sample include people with P.O. Box only addresses, some addresses not listed in the USPS Delivery Sequence File, and some newly constructed dwellings.

Interviews for this survey were conducted between June 11-17, 2026, with adults aged 18 and over representing the 50 states and the District of Columbia. Panel members were randomly drawn from AmeriSpeak. In addition, Jewish respondents were sampled at a higher rate than their proportion of the population for reasons of analysis. The oversample was drawn from the AmeriSpeak panel and respondents to the 2026 Jewish Youth Survey who agreed to be recontacted. The study includes a total of 3,040 interviews—2,962 via the web and 78 by telephone. In total, 544 recontacted respondents completed the survey online.

Panel members were invited by email or by phone from a NORC telephone interviewer. Interviews were conducted in both English and Spanish, depending on respondent preference. Respondents were offered a small monetary incentive for completing the survey. The weighted household panel recruitment rate is 24.9 percent, the survey completion rate is 35.1 percent, for a weighted cumulative response rate of 8.7 percent. The overall margin of sampling error is +/-2.8 percentage points at the 95 percent confidence level, including the design effect. The margin of sampling error may be higher for subgroups. For example, the margin of sampling error is 4.1 percentage points for Democrats, 4.6 percentage points for Republicans and 6.5 percentage points for independents. The overall margin of sampling error for the 1,022 completed interviews with Jewish respondents is +/- 5.0 percentage points at the 95 percent confidence level including the design effect.

Sampling error is only one of many potential sources of error and there may be other unmeasured error in this or any other survey.

Quality assurance checks were conducted to ensure data quality. In total, 146 interviews were removed for nonresponse to at least 50% of the questions asked of them, for completing the survey in less than one-third the median interview time for the full sample, or for straight-lining all grid questions asked of them. These interviews were excluded from the data file prior to weighting.

Once the sample has been selected and fielded, and all the study data have been collected and made final, a poststratification process is used to adjust for any survey nonresponse as well as any noncoverage or under and oversampling resulting from the study specific sample design.

Poststratification variables included age, gender, Jewish identity, census region, race/ethnicity, education, and the 2024 presidential vote. Weighting variables were obtained from the 5-Year 2018 ACS, the Jewish Americans in 2020 study by Pew Research Center, 2024 AP VoteCast, and the final results for 2024 presidential vote turnout and vote choice. The weighted data reflect the U.S. population of adults age 18 and over.

About the Associated Press-NORC Center for Public Affairs Research

The AP-NORC Center for Public Affairs Research taps into the power of social science research and the highest-quality journalism to bring key information to people across the nation and throughout the world.

- The Associated Press (AP) is an independent global news organization dedicated to factual reporting. Founded in 1846, AP today remains the most trusted source of fast, accurate, unbiased news in all formats and the essential provider of the technology and services vital to the news business. More than half the world's population sees AP journalism every day. www.ap.org
- NORC at the University of Chicago is one of the oldest objective and nonpartisan research institutions in the world. www.norc.org

The two organizations have established The AP-NORC Center for Public Affairs Research to conduct, analyze, and distribute social science research in the public interest on newsworthy topics, and to use the power of journalism to tell the stories that research reveals. Learn more at www.apnorc.org.
